

## June 3-4 Bike

Our trip to Long lake was very hot and humid. Chris was at Vermillion River camp the night before. He did a 30 K ride in that heat to join us at Long lake. Di and I met at the trailhead at Central. We immediately saw a Bear standing up and looking at us at the intersection of Straitclair and Central. We saw a few more on Central. The trail was clear of trees and in good shape. Long lake was very calm the whole time we were there. I kept saying I should have brought my canoe. I usually do. Lots of bugs. We were the only three people there. Very quiet except for one loon and a looney. It was good to be in the backcountry again.
